

EDUCATION

M.S. Information Technology (Information Systems Management) Graduating May 2025

Arizona State University, Tempe, AZ

3.81 GPA

Relevant Coursework: Analyzing Big Data, Data Visualisation, Advanced Database Management System, Information Systems Development, Advanced Big Data Analytics/AI, Natural Language Processing, Cloud Architecture

B.Tech. Electronics & Telecommunications

May 2023

Symbiosis Institute of Technology, Pune, India

3.3 GPA

TECHNICAL SKILLS

Programming Languages and libraries: Python (PyTorch, OpenCV, NumPy, pandas, scikit-learn, fpdf, Matplotlib,), SQL, Bash
Tools, Databases: PostgreSQL, AWS (S3, Lambda), MySQL, Tableau, Tableau Prep Builder, Git, GitHub, Kafka,

PROFESSIONAL EXPERIENCE

AI4M Technology Pvt. Ltd., IN: Intern

01/2023 - 07/2023

Online Coating Weight Estimation System (OCWES)

- Developed an **automated report generation system** for the OCWES using **Python** and **fpdf**, integrating **AWS S3** and **Lambda** for automated **PDF uploads** and **email notifications**, reducing manual intervention.
- Captured and preprocessed spectroscopic images using **PyTorch**, **OpenCV**, and **NumPy** for image processing applying Gaussian filtering and edge detection to enhance feature extraction.
- Designed and implemented a **PostgreSQL** database schema for efficient storage and retrieval of coating weight estimation data.
- Trained a regression-based CNN to predict continuous coating weight values, eliminating the need for manual binning.

Automated Surface Inspection

- Engineered a **real-time video processing pipeline** using **segmentation models** and **machine vision cameras**, enabling detection of multiple types of defects.
- Implemented **data cleaning** techniques and **ROI extraction** for automated surface inspection, enhancing defect detection accuracy by 75%.

PROJECTS

AI Powered Resume Optimization (Applied Project)

Spring 2025

- Developing an AI-driven tool that extracts and analyzes resume content using **open-source parsers (Pyresparser, Resume-Parser)** and **NLP techniques** to align skills with job qualifications.
- Implementing **PostgreSQL** for structured data storage and designing a user-friendly interface while deploying on **AWS** for scalability.

Automated Video Processing with Yolo and Custom OCR Engine

Summer 2024

- Integrated **PostgreSQL** for data storage, formatted extracted data to **JSON**, and sent to a remote server via **API**.
- Implemented **AWS S3** for secure image uploads, utilizing **YOLO** for object detection and custom **OCR** for container number extraction.

Data Visualization & Reporting for Coffee Shop Chain

Spring 2024

- Developed a **Tableau** dashboard analyzing 149,000+ transactions over 6 months with 10+ interactive visualizations.
- Utilized **Tableau Prep Builder** for data preprocessing and optimized dashboards for actionable insights.

School Similarity Matching Model

Spring 2024

- Implemented **KNN**, **cosine similarity** to match similar schools, achieving 89% accuracy.
- Applied **K-means clustering** and **t-SNE visualization** to group 300+ schools, enhancing data-driven insights
- Used **Python**, **pandas**, **scikit-learn** for data preprocessing.

Hotel Reservation System Database

Fall 2023

- Designed a **multi-table relational database** for hotel management, improving operations and data accessibility.
- Developed **stored procedures** and **triggers** for data accuracy and real-time reporting on revenue and occupancy.
